

• What is claimed is:

• 1. A pigment paste composition comprising:

about 15-30% by weight of pigment grinding vehicle, wherein said pigment grinding vehicle is obtainable from about 25-35% by weight of polyglycidyl ether of bisphenol A having an epoxy equivalence in a range of about 900-1200, about 5-12% by weight of propyleneglycol monomethyl ether acetate, about 8-15% by weight of partially blocked isocyanate cross-linking agent, about 25-40% by weight of ethylene glycol monobutyl ether, about 10-20% by weight of organic tertiary amino acid salt and about 0-5% by weight of deionized water;

about 2-6% by weight of an anticorrosive pigment; and

about 0.7-2.3% by weight of dibutyl tin oxide,

a ratio of solid content of said pigment/pigment grinding vehicle being about 1/0.2-1/0.45.

2. A pigment paste composition comprising:

about 15-30% by weight of pigment grinding vehicle;

about 2-6% by weight of an anticorrosive pigment, wherein the anticorrosive pigment is anyone selected from the group consisting of bismuth hydroxide, bismuth trioxide, bismuth oxide, aluminum tri-polyphosphate hydrate and magnesium aluminum hydroxide carbonate hydrate; and

about 0.7-2.3% by weight of dibutyl tin oxide,

a ratio of solid content of said pigment/pigment grinding vehicle being about 1/0.2-1/0.45.
